Older adults face numerous health problems that younger adults never imagine. Since eating is an essential daily activity that most of us think of as pleasurable, one of the most upsetting problems of aging is difficulty swallowing, which can change meal time from an enjoyable pastime to a difficult challenge, and can eventually cause very serious health problems. Wed, 20 Mar 2019 13:08:00 GMT Thickeners and Other Ways to Help Older Adults With ... - Asphyxia or asphyxiation is a condition of severely deficient supply of oxygen to the body that arises from abnormal breathing. An example of asphyxia is choking. Asphyxia causes generalized hypoxia, which affects primarily the tissues and organs. There are many

circumstances that can induce asphyxia, all of which are characterized by an inability of an individual to acquire sufficient oxygen ... Mon, 18 Mar 2019 21:10:00 GMT Asphyxia - Wikipedia - Indications for a swallowing study are dysphagia, globus sensation and aspiration. Dysphagia is a general term used to describe the inability to transport the food properly from the mouth to the stomach. Globus sensation is a term to describe the feeling, that there is something in the throat, that is in the way or needs to be swallowed. Aspiration is the most severe form of swallowing ...
