PVDF is a specialty plastic used in applications requiring the highest purity, as well as resistance to solvents, acids and hydrocarbons. Wed, 20 Mar 2019 21:43:00 GMT Polyvinylidene fluoride - Wikipedia - These reported studies have demonstrated that the incorporation of nanomaterials into polymers could not only tune structure and physicochemical properties (hydrophilicity, porosity, charge density, chemical, thermal and mechanical stability) of membranes, but also introduce unique functionalities such as antibacterial and photocatalytic characteristics into the membranes. article analyzes agricultural sustainability in the context of land degradation, rural poverty and social inequality, taking China's Loess Hills as an example. The analysis attempts to understand the multi-dimensionality of sustainability at the farm level and its relationship with physical-socio-economic-in frastructural-technological framework conditions in the context of the land set ...
